

Architectural Defensibility Guarantee: Generic consumer AI apps fail on awkward pronoun hallucinations and rigid codebases that require developer deployment for simple catalog updates. Our decoupled architecture enforces **100% deterministic pronoun and verb agreement** across third-person dossier generation and second-person direct concierge chat, pairs an **automated vector PDF compilation engine** with simulated multi-channel dispatch (Resend SMTP + Twilio SMS), and provides operators with a **zero-code CMS workbench** to publish products, pricing intervals, and promo codes without writing a line of code.

TURNKEY PRODUCTION MILESTONES & FIXED-PRICE SCOPE				TOTAL: \$1,500.00 FIXED • 12 CALENDAR DAYS	
MILESTONE	DELIVERABLES & TECHNICAL ARCHITECTURE	TIMELINE	ESCROW		
Milestone 1 Intake & Schema	Intake Engine & Deterministic Pronoun Matrix Interactive profile studio, Zod validation schema, deterministic pronoun resolver (they/them, she/her, he/him, custom ze/zir) with strict subject-verb agreement (is/are, has/have, does/do), prompt template interpolation engine, and encrypted localStorage persistence.	Days 1–3	\$375.00		
Milestone 2 Dual-Model AI	Dual-Model AI Orchestrator & Conversational Concierge Zero-SDK native HTTP inference pipeline calling OpenAI gpt-4o-mini (structured JSON mode), sub-second circuit-breaker failover to Google Gemini 2.5 Flash, offline deterministic rule engine fallback, and profile-aware conversational AI chatbot.	Days 4–6	\$375.00		
Milestone 3 PDF & Delivery	Automated Vector PDF Dossier & Multi-Channel Dispatch High-density executive PDF layout (summary, 3 core insights, 3-phase roadmap, risk matrix) with print-ready vector styling and zero middle void. Resend SMTP email and Twilio SMS notification triggers, plus user security center with 2FA TOTP setup.	Days 7–9	\$375.00		
Milestone 4 CMS & Deploy	Zero-Code CMS Workbench, Promo Codes & Production Handover Operator workbench for publishing dynamic services, prices, and features without code changes. Promo code validation engine with discount calculation. Production Vercel deployment, CI/CD pipeline, turnkey blueprints (n8n, Make, Inngest, Docker), and 30-day warranty.	Days 10–12	\$375.00		
TOTAL TURNKEY PRODUCTION COMMITMENT (4 PHASED MILESTONES)			12 Days	\$1,500.00	

PHASED ESCROW RELEASE GATES

Milestone 1: Intake & Pronoun Matrix Complete	\$375.00 (25%)
Milestone 2: Dual-Model LLM & Concierge Live	\$375.00 (25%)
Milestone 3: PDF Vector Engine & 2FA Armed	\$375.00 (25%)
Milestone 4: CMS Workbench & Final Production Release	\$375.00 (25%)

SYSTEMS ENGINEERING GUARDRAILS & SLAS

- ✓ **Grammar Guard:** 100.0% deterministic pronoun agreement before and after prompt generation.
- ✓ **Dual-Model Failover:** Sub-second circuit-breaker between OpenAI and Gemini with 99.99% SLA.
- ✓ **Zero Code Overhead:** Operators add new products, pricing tiers, and promo codes in seconds.
- ✓ **Vector PDF Guarantee:** Publication-grade styling with 1-click client-side download and print.

100% IP OWNERSHIP

All code, prompts, and documentation belong exclusively to the client upon milestone settlement. Zero vendor lock-in.

GUARANTEED TURNAROUND

Full 12 calendar day delivery schedule with daily async progress updates and staging deployments.

30-DAY POST-LAUNCH WARRANTY

Includes bug fixes, prompt fine-tuning, and zero-charge platform support for 30 calendar days following launch.

TURNKEY PORTABILITY

Includes complete self-hosting blueprints for Docker, Inngest durable workflows, Make.com, and n8n nodes.
